Report Overview

A Wet Type Feed Extruder is a specialized machine designed for the production of wet pet food, aquafeed, and other moist feed products. It operates by extruding a mixture of raw materials, including meat, fishmeal, grains, and other ingredients, through a heated barrel and die. The process involves cooking the mixture under high pressure and temperature, which gelatinizes the starches and proteins, creating a moist, nutritious, and easily digestible feed. This type of extruder is particularly useful for creating high-quality feed with a longer shelf life, as the cooking process helps to kill bacteria and other pathogens.
