## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Zinc Carbonate Hydroxide competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Zinc Carbonate Hydroxide is an inorganic compound, appearing as a white, fine, amorphous powder, odorless and tasteless. It is insoluble in water and ethanol, slightly soluble in ammonia, and soluble in dilute acids and sodium hydroxide solution. The upstream of the industry chain mainly involves raw material supply, centered on zinc resources, including zinc ingots, zinc ore (such as sphalerite), and zinc-containing raw materials such as zinc oxide. Downstream applications are wide-ranging, including as a reinforcing filler and flame retardant/wear retardant in rubber and plastics; and as a desulfurizing agent and catalyst in the chemical industry. Global sales in 2024 were approximately 70,000 tons, with an average market price of approximately US\$2,200 per ton. The industry's gross profit margin ranges from 15% to 30%. The Zinc Carbonate Hydroxide industry benefits from the stability and expansion of its downstream application markets. As an important zinc salt product, it plays a key role in multiple fields such as chemicals, pharmaceuticals, and animal feed. Particularly in the chemical sector, its demand as a raw material for the production of zinc oxide and calamine, as well as as a rubber vulcanizing activator, is very stable. Market competition and cost pressures persist. The upstream of basic zinc carbonate is greatly affected by fluctuations in the prices of zinc concentrate and zinc ingots. It also faces substitution competition from zinc oxide, specialty zinc salts, and organic/inorganic composite functional materials.

The global Zinc Carbonate Hydroxide market size was estimated at USD 154.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.20%

during the forecast period.
