## **Abstracts**

Cholera is a bacterial disease caused by infection from *Vibrio cholerae* species (O1, O139), usually spread through contaminated water. Cholera causes severe diarrhoea and dehydration. Left untreated, cholera can be fatal in a matter of hours, even in previously healthy people.

This report provides the current incidence population for Cholera for Selected Asian Markets (Cambodia, Indonesia, Lao PDR, and Viet Nam) split by gender and 5-year age cohort. Along with the current incidence, the report also contains a disease overview of the risk factors, disease diagnosis and prognosis along with specific variations by geography and ethnicity.

Providing a value-added level of insight from the analysis team at Black Swan, several of the main symptoms of Cholera have been quantified and presented alongside the overall incidence figures. These sub-populations within the main disease are also included at a country level across the 10-year forecast snapshot.

Risk factors for contracting cholera relate mostly to contaminated water and sanitation. The disease shows marked seasonality in developing nations, and outbreaks can occur during natural disasters (tsunamis) and complex emergencies (generally affecting the water supply / sanitation infrastructure).

This report is built using data and information sourced from the proprietary Epiomic patient segmentation database. To generate accurate patient population estimates, the Epiomic database utilises a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies. All of the sources used to generate the data and analysis have been identified

in the report.

#### Reason to buy

Able to quantify patient populations in global Cholera market to target the development of future products, pricing strategies and launch plans.

Gain further insight into the incidence of the subdivided types of Cholera and identify patient segments with high potential.

Delivery of more accurate information for clinical trials in study sizing and realistic patient recruitment for various countries.

Identify sub-populations within Cholera which require treatment.

Gain an understanding of the specific markets that have the largest number of Cholera patients.

## Contents

Introduction

Cause of the Disease

Risk Factors & Prevention

Diagnosis of the Disease

Variation by Geography

Disease Prognosis & Clinical Course

Methodology for quantification of patient numbers

    10 year forecast horizon

Top-line estimated incidence for Cholera

Cholera in Vietnam

    Distribution by province within the Red River Delta area

    Distribution by province within the North Central & Central Coastal areas

Abbreviations used in the report

Other Black Swan Analysis Publications

Black Swan Analysis Online Patient-Based Databases

Patient-Based Offering

Online Pricing Data and Platforms

References

Appendix

List of Figures

Map of average annual cholera incidence and oral cholera vaccine use

## List Of Tables

### LIST OF TABLES

Incidence rate and case fatality rate for cholera by WHO region

WHO region definitions

Cases of cholera reported to the WHO by country and year

Incidence of cholera, total (000s)

Estimated case fatality of cholera, total (000s)

Cholera estimated caseload in Viet Nam by region, total (000s)

Cholera estimated caseload in Red River Delta by Province, total (000s)

Cholera estimated caseload in the North Central and Central Coastal areas by Province, total (000s)

Abbreviations and Acronyms used in the report

Cambodia Estimated Incidence of Cholera (median projection) by 5-yr age cohort, total (000s)

Cambodia Estimated Incidence of Cholera (low projection) by 5-yr age cohort, total (000s)

Cambodia Estimated Incidence of Cholera (high projection) by 5-yr age cohort, total (000s)

Indonesia Estimated Incidence of Cholera (median projection) by 5-yr age cohort, total (000s)

Indonesia Estimated Incidence of Cholera (low projection) by 5-yr age cohort, total (000s)

Indonesia Estimated Incidence of Cholera (high projection) by 5-yr age cohort, total (000s)

Lao PDR Estimated Incidence of Cholera (median projection) by 5-yr age cohort, total (000s)

Lao PDR Estimated Incidence of Cholera (low projection) by 5-yr age cohort, total (000s)

Lao PDR Estimated Incidence of Cholera (high projection) by 5-yr age cohort, total (000s)

Viet Nam Estimated Incidence of Cholera (median projection) by 5-yr age cohort, total (000s)

Viet Nam Estimated Incidence of Cholera (low projection) by 5-yr age cohort, total (000s)

Viet Nam Estimated Incidence of Cholera (high projection) by 5-yr age cohort, total (000s)

Cambodia Population (median projection variant) by 5-yr age cohort, males (000s)

Cambodia Population (median projection variant) by 5-yr age cohort, females (000s)  
Indonesia Population (median projection variant) by 5-yr age cohort, males (000s)  
Indonesia Population (median projection variant) by 5-yr age cohort, females (000s)  
Lao PDR Population (median projection variant) by 5-yr age cohort, males (000s)  
Lao PDR Population (median projection variant) by 5-yr age cohort, females (000s)  
Viet Nam Population (median projection variant) by 5-yr age cohort, males (000s)  
Viet Nam Population (median projection variant) by 5-yr age cohort, females (000s)

## I would like to order

Product name: Epiomic Epidemiology Series: Cholera Forecast for selected Asian Markets 2017-2027

Product link: <https://marketpublishers.com/r/EE73851B275EN.html>

Price: US\$ 2,900.00 (Single User License / Electronic Delivery)
