Black Swan Analysis Epiomic Epidemiology Series Forecast Report on Age-related Macular Degeneration (AMD) Disease in 7 Major Markets

Age-related macular degeneration (AMD or ARMD) or Age-related Maculopathy (ARM) is a condition that involves the degeneration and damage to the central area of the retina – the macula. It is currently a common cause of visual impairment in Western Europe. AMD is typically painless, and the loss of central vision usually occurs in both eyes but may progress at different speeds.

This report provides the current prevalent population for AMD across 7 Major Markets (USA, France, Germany, Italy, Spain, UK and Japan) split by gender and 5-year age cohort. Along with the current prevalence, the report also contains a disease overview of the risk factors, disease diagnosis and prognosis along with specific variations by geography and ethnicity.

Providing a value-added level of insight from the analysis team at Black Swan, several of the main symptoms and co-morbidities of AMD have been quantified and presented alongside the overall prevalence figures. These sub-populations within the main disease are also included at a country level across the 10-year forecast snapshot.

Main symptoms and co-morbidities for AMD include:

Serous retinal detachment

Haemorrhage

Charles Bonnet Syndrome

Depression

Reduced quality of life

Hypertension

Hypercholesterolaemia (abdominal obesity is a specific risk factor for males)

This report is built using data and information sourced from the proprietary Epiomic patient segmentation database. To generate accurate patient population estimates, the Epiomic database utilises a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies. All of the sources used to generate the data and analysis have been identified in the report.

Reason to buy

Able to quantify patient populations in global AMD's market to target the development of future products, pricing strategies and launch plans.

Gain further insight into the prevalence of the subdivided types of AMD and identify patient segments with high potential.

Delivery of more accurate information for clinical trials in study sizing and realistic patient recruitment for various countries.

Provide a level of understanding on the impact from specific co-morbid conditions on AMD's prevalent population.

Identify sub-populations within AMD which require treatment.

Gain an understanding of the specific markets that have the largest number of AMD patients.

Contents

Introduction

Cause of the Disease

Risk Factors & Prevention

Diagnosis of the Disease

Variation by Geography/Ethnicity

Disease Prognosis & Clinical Course

Key Co-morbid Conditions/Features Associated with the Disease

Methodology for Quantification of Patient Numbers

Top-Line Prevalence for Essential Thrombocythemia

Features of Essential Thrombocythemia Patients

 Type of Thrombotic Events

 Abnormal Organ Enlargement Associated with ET

 Blood Cell Associated Conditions

 Gene Mutations in ET

Abbreviations used in the Report

Other Black Swan Analysis Publications

Black Swan Analysis Online Patient-Based Databases

Patient-Based Offering

Online Pricing Data and Platforms

References

Appendix

List Of Tables

LIST OF TABLES

WHO classification criteria for ET diagnosis

Prevalence of Essential Thrombocythemia, total (000s)

Prevalence of Essential Thrombocythemia, males (000s)

Prevalence of Essential Thrombocythemia, females (000s)

Type of thrombosis in Essential Thrombocythemia patients, total (000s)

History of thrombotic event in Essential Thrombocythemia patients, total (000s)

Site of arterial thrombosis in Essential Thrombocythemia patients, total (000s)

Site of venous thrombosis in Essential Thrombocythemia patients, total (000s)

Prevalence of splenomegaly in Essential Thrombocythemia, total (000s)

Prevalence of hepatomegaly in Essential Thrombocythemia, total (000s)

Prevalence of myelofibrosis (SMF) in Essential Thrombocythemia, total (000s)

Prevalence of anaemia in Essential Thrombocythemia, total (000s)

Prevalence of JAK2 mutation in Essential Thrombocythemia patients, total (000s)

Abbreviations and Acronyms used in the report

USA Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

USA Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

France Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

France Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

Germany Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

Germany Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

Italy Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

Italy Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

Spain Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

Spain Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

UK Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

UK Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

Brazil Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

Brazil Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

Japan Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

Japan Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)

India Prevalence of Essential Thrombocythemia by 5-yr age cohort, males (000s)

India Prevalence of Essential Thrombocythemia by 5-yr age cohort, females (000s)
