Abstracts

Gout is caused by the build up of uric acid in the joints due to the body producing too much or excreting too little in the urine, and develops into sodium urate crystals. The formation of these crystals causes pain and inflammation around bone joints. The majority of Gout attacks involve the first metatarsophalangeal joint (FMJ) which is the “big toe” (also known as podagra). Gout can also occur in other joints of the body such as the spine, other parts of the foot, hips or shoulders and hands.

This report provides the current prevalent population for Gout across 15 Major Markets (USA, France, Germany, Italy, Spain, UK, Brazil, Japan, Canada, Australia, Netherlands, Czech Republic, Greece, India and Mexico) split by gender and 5-year age cohort. Along with the current prevalence, the report provides an overview of the frequency of Gout flares, joint involvement, kidney function and presence of tophi in Gout. The report also contains a disease overview of the risk factors, disease diagnosis and prognosis along with specific variations by geography and ethnicity.

Providing a value-added level of insight from the analysis team at Black Swan, several of the main symptoms and co-morbidities of Gout have been quantified and presented alongside the overall prevalence figures. These sub-populations within the main disease are also included at a country level across the 10-year forecast snapshot.

Main symptoms and co-morbidities for Gout include:

Obesity and weight gain

Kidney stones, renal cysts and renal failure

Coronary artery disease, Chronic Heart Failure

Hypertension

Dyslipidaemia

Diabetes mellitus

Metabolic syndrome

Hyperuricaemia

This report is built using data and information sourced from the proprietary Epiomic patient segmentation database. To generate accurate patient population estimates, the Epiomic database utilises a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies. All of the sources used to generate the data and analysis have been identified in the report.

Reason to buy

Able to quantify patient populations in global Gout's market to target the development of future products, pricing strategies and launch plans.

Gain further insight into the prevalence of the subdivided types of Gout and identify patient segments with high potential.

Delivery of more accurate information for clinical trials in study sizing and realistic patient recruitment for various countries.

Provide a level of understanding on the impact from specific co-morbid conditions on Gout's prevalent population.

Identify sub-populations within Gout which require treatment.

Gain an understanding of the specific markets that have the largest number of Gout patients.

Contents

Introduction

Cause of the Disease

Risk Factors & Prevention

Diagnosis of the Disease

Variation by Geography/Ethnicity

Disease Prognosis & Clinical Course

Key Co-morbid Conditions /Features Associated with the Disease

Methodology for Quantification of Patient Numbers

Additional data available on request

Top-Line Prevalence for Gout

Features of Gout Patients Experiencing Flare in Past 12 Months

Frequency of Flare in past 12 months

Joint Involvement in Gout patients during Flare

Kidney Function and Features in patients with Gout

Features of Gout Patients at Initial Presentation

Associated Co-morbid Conditions of Gout

Tophaceous Gout

Abbreviations used in the Report

Appendix

List Of Figures

LIST OF FIGURES

ACR criteria for diagnosis of Gout

ROME criteria for diagnosis of Gout

New York criteria for diagnosis of Gout

List Of Tables

LIST OF TABLES

Prevalence of Gout, total (000s)
Prevalence of Gout, males (000s)
Prevalence of Gout, females (000s)
Gout patients with at least one flare in the past 12 months, total (000s)
Number of flares in past 12 months, total (000s)
Location of affected joint in patients with Gout flare, total (000s)
The extent of joint involvement in patients during Gout flare, total (000s)
eGFR status of patients with Gout, total (000s)
Prevalence of Renal Cysts in patients with Gout, total (000s)
Prevalence of Nephrolithiasis in patients with Gout, total (000s)
Estimated annual incidence of Gout, total (000s)
Body Mass Index of patients with Gout at initial presentation, total (000s)
Gout patients with a family history of Gout, total (000s)
Uric acid level at presentation for patients with Gout, total (000s)
Diabetes Mellitus in patients with Gout, total (000s)
Dyslipidaemia in patients with Gout, total (000s)
Prevalence of Hypertension in patients with Gout, total (000s)
Hyperuricaemia in patients with Gout, total (000s)
Metabolic Syndrome in patients with Gout, total (000s)
Osteoarthritis in patients with Gout, total (000s)
Peripheral Artery Disease in patients with Gout, total (000s)
Presence of tophi in patients with Gout, total (000s)
Patients with tophi by number present, total (000s)
Abbreviations and Acronyms used in the report
USA Prevalence of Gout by 5-yr age cohort, males (000s)
USA Prevalence of Gout by 5-yr age cohort, females (000s)
France Prevalence of Gout by 5-yr age cohort, males (000s)
France Prevalence of Gout by 5-yr age cohort, females (000s)
Germany Prevalence of Gout by 5-yr age cohort, males (000s)
Germany Prevalence of Gout by 5-yr age cohort, females (000s)
Italy Prevalence of Gout by 5-yr age cohort, males (000s)
Italy Prevalence of Gout by 5-yr age cohort, females (000s)
Spain Prevalence of Gout by 5-yr age cohort, males (000s)
Spain Prevalence of Gout by 5-yr age cohort, females (000s)
United Kingdom Prevalence of Gout by 5-yr age cohort, males (000s)

United Kingdom Prevalence of Gout by 5-yr age cohort, females (000s)
Brazil Prevalence of Gout by 5-yr age cohort, males (000s)
Brazil Prevalence of Gout by 5-yr age cohort, females (000s)
Japan Prevalence of Gout by 5-yr age cohort, males (000s)
Japan Prevalence of Gout by 5-yr age cohort, females (000s)
Canada Prevalence of Gout by 5-yr age cohort, males (000s)
Canada Prevalence of Gout by 5-yr age cohort, females (000s)
Australia Prevalence of Gout by 5-yr age cohort, males (000s)
Australia Prevalence of Gout by 5-yr age cohort, females (000s)
Netherlands Prevalence of Gout by 5-yr age cohort, males (000s)
Netherlands Prevalence of Gout by 5-yr age cohort, females (000s)
Czech Republic Prevalence of Gout by 5-yr age cohort, males (000s)
Czech Republic Prevalence of Gout by 5-yr age cohort, females (000s)
Greece Prevalence of Gout by 5-yr age cohort, males (000s)
Greece Prevalence of Gout by 5-yr age cohort, females (000s)
India Prevalence of Gout by 5-yr age cohort, males (000s)
India Prevalence of Gout by 5-yr age cohort, females (000s)
Mexico Prevalence of Gout by 5-yr age cohort, males (000s)
Mexico Prevalence of Gout by 5-yr age cohort, females (000s)
