Abstracts

Hospital acquired infections (HAI), or nosocomial infections - infections acquired by patients or staff during in-patient care (hospital admission). This is the point or annual prevalence of HAI (or HCAI), equivalent to a number of cases of an infection per year.

HAI can be caused by any pathogen, including bacteria, viruses and fungi.

This report provides the current incident population for Hospital Acquired Infections across 15 Major Markets (USA, France, Germany, Italy, Spain, UK, Netherlands, Sweden, Norway, Denmark, Finland, Poland, Romania, Czech Republic and Japan) split by gender and 5-year age cohort. Along with the current incidence, the report also contains a disease overview of the risk factors, disease diagnosis and prognosis along with specific variations by geography and ethnicity.

Providing a value-added level of insight from the analysis team at Black Swan, several of the main symptoms and co-morbidities of Hospital Acquired Infections have been quantified and presented alongside the overall incidence figures. These sub-populations within the main disease are also included at a country level across the 10-year forecast snapshot.

The following are associated with HAI:

ICU admission (particularly intubated patients)

Surgery

Catheterisation & other invasive procedures

Neonates

Compromised immune response

This report is built using data and information sourced from the proprietary Epiomic patient segmentation database. To generate accurate patient population estimates, the Epiomic database utilises a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies. All of the sources used to generate the data and analysis have been identified in the report.

Reason to buy

Able to quantify patient populations in global Hospital Acquired Infections market to target the development of future products, pricing strategies and launch plans.

Gain further insight into the incidence of the subdivided types of Hospital Acquired Infections and identify patient segments with high potential.

Delivery of more accurate information for clinical trials in study sizing and realistic patient recruitment for various countries.

Provide a level of understanding on the impact from specific co-morbid conditions on Hospital Acquired Infections incident population.

Identify sub-populations within Hospital Acquired Infections which require treatment.

Gain an understanding of the specific markets that have the largest number of Hospital Acquired Infections patients.

Contents

Introduction
Cause of the Disease
Risk Factors & Prevention
Diagnosis of the Disease
Variation by Geography/Ethnicity
Disease Prognosis & Clinical Course
Key comorbid conditions/Features associated with the disease
Methodology for quantification of patient numbers
 Additional data available on request
Top-line Incidence for Hospital Acquired Infections
HAI by major site of infection
HAI by main pathogen
Treatment of HAIs
Abbreviations used in the report
Other Black Swan Analysis Publications
Black Swan Analysis Online Patient-Based Databases
Patient-Based Offering
Online Pricing Data and Platforms
References
Appendix

List Of Tables

LIST OF TABLES

Incidence of Hospital Acquired Infections, total (000s)
Incidence of Hospital Acquired Infections, males (000s)
Incidence of Hospital Acquired Infections, females (000s)
Hospital Acquired Pneumonia, total (000s)
Hospital Acquired Surgical site infection, total (000s)
Hospital Acquired Gastrointestinal infection, total (000s)
Hospital Acquired Urinary tract infection, total (000s)
Hospital Acquired Primary blood stream infection, total (000s)
Hospital Acquired ENT/mouth infection, total (000s)
Hospital Acquired Lower respiratory tract infection, total (000s)
Hospital Acquired Skin and soft tissue infection, total (000s)
Hospital Acquired Cardiovascular system infection, total (000s)
Hospital Acquired Bone and joint infection, total (000s)
Hospital Acquired CNS infection, total (000s)
Hospital Acquired Reproductive tract infection, total (000s)
Hospital Acquired Systemic infection, total (000s)
Hospital Acquired Catheter-related infection, total (000s)
HAI episodes by main pathogen present, total (000s)
Hospital Acquired Clostridium difficile, total (000s)
Hospital Acquired Rotavirus, total (000s)
Treated patient equivalents, total (000s)
HAI treatment options, total (000s)
Abbreviations and Acronyms used in the report
USA Hospital Episodes by 5-yr age cohort, males (000s)
USA Hospital Episodes by 5-yr age cohort, females (000s)
France Hospital Episodes by 5-yr age cohort, males (000s)
France Hospital Episodes by 5-yr age cohort, females (000s)
Germany Hospital Episodes by 5-yr age cohort, males (000s)
Germany Hospital Episodes 5-yr age cohort, females (000s)
Italy Hospital Episodes by 5-yr age cohort, males (000s)
Italy Hospital Episodes by 5-yr age cohort, females (000s)
Spain Hospital Episodes by 5-yr age cohort, males (000s)
Spain Hospital Episodes by 5-yr age cohort, females (000s)
UK Hospital Episodes by 5-yr age cohort, males (000s)
UK Hospital Episodes by 5-yr age cohort, females (000s)

Netherlands Hospital Episodes by 5-yr age cohort, males (000s)
Netherlands Hospital Episodes by 5-yr age cohort, females (000s)
Sweden Hospital Episodes by 5-yr age cohort, males (000s)
Sweden Hospital Episodes by 5-yr age cohort, females (000s)
Norway Hospital Episodes by 5-yr age cohort, males (000s)
Norway Hospital Episodes by 5-yr age cohort, females (000s)
Denmark Hospital Episodes by 5-yr age cohort, males (000s)
Denmark Hospital Episodes by 5-yr age cohort, females (000s)
Finland Hospital Episodes by 5-yr age cohort, males (000s)
Finland Hospital Episodes by 5-yr age cohort, females (000s)
Poland Hospital Episodes by 5-yr age cohort, males (000s)
Poland Hospital Episodes by 5-yr age cohort, females (000s)
Romania Hospital Episodes by 5-yr age cohort, males (000s)
Romania Hospital Episodes by 5-yr age cohort, females (000s)
Czech Republic Hospital Episodes by 5-yr age cohort, males (000s)
Czech Republic Hospital Episodes by 5-yr age cohort, females (000s)
Japan Hospital Episodes by 5-yr age cohort, males (000s)
Japan Hospital Episodes by 5-yr age cohort, females (000s)
