Abstracts

Nocturia is a relatively common urological problem and involves waking up more than twice during the night to void the bladder. Nocturia tends to be caused by other underlying diseases and processes, such as polyuria, Benign Prostatic Hyperplasia (BPH) or bladder storage disorders. This report provides the current prevalent population for Nocturia across 8 Major Markets (USA, France, Germany, Italy, Spain, UK, Brazil and Japan) split by gender and 5-year age cohort. Along with the current prevalence, the report provides an overview of the types, occlusion locations and the prevalence of associated disorders of Nocturia. The report also contains a disease overview of the risk factors, disease diagnosis and prognosis along with specific variations by geography and ethnicity.

Providing a value-added level of insight from the analysis team at Black Swan, several of the main symptoms and co-morbidities of Nocturia have been quantified and presented alongside the overall prevalence figures. These sub-populations within the main disease are also included at a country level across the 10-year forecast snapshot.

Main symptoms and co-morbidities for Nocturia include:

Diabetes

Hypertension

Multiple sclerosis

Urinary Incontinence

Benign Prostatic Hyperplasia

Chronic Heart Failure

Chronic kidney disease

Overactive bladder

Alcohol consumption

This report is built using data and information sourced from the proprietary Epiomic patient segmentation database. To generate accurate patient population estimates, the Epiomic database utilises a combination of several world class sources that deliver the most up to date information from patient registries, clinical trials and epidemiology studies. All of the sources used to generate the data and analysis have been identified in the report.

Reason to buy

Able to quantify patient populations in global Nocturia's market to target the development of future products, pricing strategies and launch plans.

Gain further insight into the prevalence of the subdivided types of Nocturia and identify patient segments with high potential.

Delivery of more accurate information for clinical trials in study sizing and realistic patient recruitment for various countries.

Provide a level of understanding on the impact from specific co-morbid conditions on Nocturia's prevalent population.

Identify sub-populations within Nocturia which require treatment.

Gain an understanding of the specific markets that have the largest number of Nocturia patients.

Contents

- Introduction
- Cause of the Disease
- Risk Factors and Prevention
- Diagnosis of the Disease
- Variation by Geography/ Ethnicity
- Disease Prognosis and Clinical Course
- Key Co-Morbid Conditions / Features associated with the Disease
- Methodology for Quantification of Patient Numbers
- Top-Line Prevalence for Nocturia
- Main Features of Nocturia Patients
 - Aetiology
 - C-reactive Protein Status
 - Frequency of Night-Time Voids
 - Concomitant Conditions for Nocturia
 - BMI Status of Patients with Nocturia
- Abbreviations used in the Report
- Other Black Swan Analysis Publications
- Black Swan Analysis Online Patient-Based Databases
- Patient-Based Offering
- Online Pricing Data and Platforms
- References
- Appendix

List Of Tables

LIST OF TABLES & FIGURES

Algorithm for the Definition and Treatment of Nocturia
Prevalence of Nocturia, total (000s)
Prevalence of Nocturia, males (000s)
Prevalence of Nocturia, females (000s)
Nocturia Patients by Aetiology, total (000s)
Nocturia Patients by CRP level, total (000s)
Frequency of Night-Time Voids in Patients with Nocturia, total (000s)
Prevalence of Diabetes in Patients with Nocturia, total (000s)
Prevalence of Hypertension in Patients with Nocturia, total (000s)
Prevalence of BPH in Patients with Nocturia, total (000s)
Prevalence of CHF in Patients with Nocturia, total (000s)
Prevalence of Urinary Incontinence in Patients with Nocturia, total (000s)
Prevalence of Multiple Sclerosis in Patients with Nocturia, total (000s)
BMI Status of Patients with Nocturia, total (000s)
Abbreviations and Acronyms used in the Report
USA Prevalence of Nocturia by 5-yr age cohort, males (000s)
USA Prevalence of Nocturia by 5-yr age cohort, females (000s)
France Prevalence of Nocturia by 5-yr age cohort, males (000s)
France Prevalence of Nocturia by 5-yr age cohort, females (000s)
Germany Prevalence of Nocturia by 5-yr age cohort, males (000s)
Germany Prevalence of Nocturia by 5-yr age cohort, females (000s)
Italy Prevalence of Nocturia by 5-yr age cohort, males (000s)
Italy Prevalence of Nocturia by 5-yr age cohort, females (000s)
Spain Prevalence of Nocturia by 5-yr age cohort, males (000s)
Spain Prevalence of Nocturia by 5-yr age cohort, females (000s)
United Kingdom Prevalence of Nocturia by 5-yr age cohort, males (000s)
United Kingdom Prevalence of Nocturia by 5-yr age cohort, females (000s)
Brazil Prevalence of Nocturia by 5-yr age cohort, males (000s)
Brazil Prevalence of Nocturia by 5-yr age cohort, females (000s)
Japan Prevalence of Nocturia by 5-yr age cohort, males (000s)
Japan Prevalence of Nocturia by 5-yr age cohort, females (000s)
