Abstracts

Includes 3 FREE quarterly updates

BMI View: Australia's residential building sector will continue to prop up wider construction activity over 2015, but growth will not be sustainable at current levels as we expect a slowdown in the housing market beyond 2016. Growth will also be weighed by political risks, a slowdown in the mining sector and a decline in competitiveness.

Key Trends And Developments

We remain positive over growth for the sector in 2015, although our 2.9% growth forecast for the construction sector is still lower than the 10-year historical average of 4.4% (between 2004 and 2013).
