Abstracts

Includes 3 FREE quarterly updates

BMI View: The Canadian construction industry will contract 0.5% in 2015 as cuts to private cap-ex in the primary sector and a H215 slowdown in residential construction weigh on growth. We expect the entire industry as a whole to recover in 2016, driven by the new Liberal government's fiscal stimulus plan, which will double public infrastructure spending over the next 10-years.

Latest Updates

The Liberal government's victory in the October federal election is a win for infrastructure development. The Liberal fiscal stimulus plan will double public spending into infrastructure over the next 10 years.

The Liberal government also plans to create a Canada Infrastructure Bank to help municipalities finance infrastructure projects by providing debt financing, loan guarantees, and bundling smaller projects to make them more attractive to institutional investors.
