BMI View: As Europe's largest economy, Germany is one of the world's most important markets for commercial real estate. The recent economic downturn has done little to undermine the Germany's status as one of the leading destinations for international investment, with the country gaining a reputation as a 'safe haven' among many investors.

In many ways a barometer for the Western European region, the health of Germany's commercial real estate sector tends to reflect the current state of the German and wider eurozone economy. As detailed in BMI's most recent sector, the commercial real estate sector enjoyed a strong start to 2014, with rental rates experiencing upward growth due to a supportive macroeconomic backdrop and a brightening supply and demand picture.
