Abstracts

Includes 3 FREE quarterly updates

The Hungarian petrochemicals industry experienced strong growth in 2016 on the back of robust performance in the automotive sector. However, the over-dependence on car making places means that the production of polymers and rubbers is influenced by the automotive industry, which is set for slower growth over the medium term.

BMI estimates that rubber and plastic output grew by around 15% y-o-y in 2015, while chemicals output rose 4%. Petrochemicals producer MOL saw output at its Hungarian plants surge with double digit growth accompanied by bigger margins.
