Abstracts

Includes 3 FREE quarterly updates

BMI View: Like many markets in the Central Eastern Europe (CEE) region, Hungary's commercial real estate sector has been badly hit by the region's economic downturn and the continuing effects of the eurozone debt crisis. In H114, there were positive signs that the downturn had bottomed out as demand for commercial real estate space appeared to be growing once again in some areas of the market. The Hungary Q314 Real Estate Report assesses the outlook for the sector over the remainder of 2014, in the light of the country's improving economic situation.

With a focus on the country's principal cities of Budapest, Debrecen and Gyor, the report covers rental market performance in terms of rates and yields across the commercial office, retail and industrial sectors. As well as in-depth analysis and forecasting for each of these cities and segments, reports fed back to us from our in-country research teams provide a snap-shot of the health of each market
