Abstracts

Includes 3 FREE quarterly updates

BMI View: The confirmation of Joko 'Jokowi' Widodo as Indonesian president in July, solidifies the country's growing reputation as one of the most attractive emerging real estate investment markets. It had looked as though continued uncertainty surrounding the outcome of July's general election would deter investment, further adding to the effects of the country's cooling economic growth and stymied real estate demand.

With a focus on the three principal cities of Jakarta, Bandung and Bali, the Q4 2014 Indonesia Real Estate report covers the property fundamentals of the commercial real estate market rental market and examines the office, retail, industrial and construction segments throughout the country.
