Abstracts

Includes 3 FREE quarterly updates

The signing of the Joint Comprehensive Plan of Action between the Iranian government and the P5+1, comprised of the five permanent members of the Security Council and Germany, an agreement aimed at bringing an end to sanctions on Iran through agreement on the country's nuclear programme, has precipitated considerable activity among foreign investors looking to take advantage of the country's considerable market for electricity, both in terms of domestic supply and export. Since the signing of the agreement, several companies, many of them European, and several government delegations have visited Iran, signing agreements with the government aimed at installing a number of new power plants in the country.
