Abstracts

Includes 3 FREE quarterly updates

BMI View: Despite a slowing and muted construction industry growth picture, we do not expect any major fluctuations, and while steadiness may not spell a market with abundant opportunity, investors can be assured of Lithuania's position as an attractive investment destination, owing to its EU membership. The EU is investing heavily across the Baltic region in energy and transport corridors to diversify energy supply and improve business ties.

Latest Forecasts

Growth in Lithuania's construction industry will slow drastically by 2025, when we forecast a 0.3% contraction, from 14.3% in 2014 and 6.5% in 2015, as the small market matures and EU integration projects complete.
