Abstracts

BMI View: Mongolia's mining sector growth will accelerate on the back of foreign mining investment, a robust infrastructure framework and the country's strategic close proximity to major export markets such as China. Projects such as Rio Tinto's Oyu Tolgoi mine will significantly increase the country's mining output over the coming years.

Latest Developments & Trends

On May 18, 2015, an agreement was reached between Turquoise Hill (a Rio Tinto subsidiary) and Mongolia's government to go ahead with a USD5.4bn underground expansion. Accordingly, in December 2015 Rio Tinto announced that the company has lined up a combined USD4.4 billion from 20 lenders to fund the expansion of Oyu Tolgoi. The end of the deadlock between the Mongolian government and Turquoise Hill Resources over the Oyu Tolgoi mine in Mongolia's South Gobi region further supports our view of rapid long-term growth in Mongolia's gold and copper output. An increasingly favourable investment climate will allow overseas miners to take advantage of the country's considerable gold and copper reserves. The Oyu Tolgoi mine will be the sector's key growth driver and account for around onethird of Mongolia's economy once the mine reaches full production capacity in 2021.

Despite calls for greater resource nationalism over the past quarters, we believe the Mongolian government will tone down its anti-foreign investment stance against miners. The government's policy priorities will shift away from the populist tones outlined during the 2013 election campaign, back to a more market-friendly platform. However, anti-foreign investor sentiment amongst the public remains a major issue, and is the key reason why the government took a more pronounced hard-line stance towards key foreign investors in the country, notably global mining major Rio Tinto. The split in the super coalition is a signal

that political will power to push through deals is waning. We are not optimistic on the prospects for progress on the Tavan Tolgoi projects as the government is unlikely to want to tackle the issue with an election around the corner.
