Includes 3 FREE quarterly updates

BMI View: Mozambique will benefit from better power security due to the diversification of the power sector; with major hydropower, gas-fired and coal-fired projects set to come online in our forecast period up until 2024. The market is currently one of the more attractive investments in SSA.

Latest Updates And Structural Trends

The 100MW Ressano Garcia power plant, developed by Mozambican firm Gigawatt, is the first IPP to come online and operate in Mozambique.

Continued investments in Mozambique's natural gas sector means gas-fired power generation is becoming an increasingly attractive power source.

Ncondezi has said it is looking to increase their 300MW coal-fired plant's capacity to 1800MW. The initial 300MW capacity is to be generated in 2018.
