

# Nigeria Petrochemicals Report 2016

<https://marketpublishers.com/r/N749A694904EN.html>

Date: November 2015

Pages: 68

Price: US\$ 1,295.00 (Single User License)

ID: N749A694904EN

## Abstracts

**Includes 3 FREE quarterly updates**

BMI View: Nigeria remains the most significant sub-Saharan African market, in terms of size, growth and future potential. Growth in gas production is set to spur downstream petrochemicals industries, particularly fertiliser and methanol and under the Buhari administration the business environment has improved, even though the decline in oil prices and the depreciation of the naira have had a negative effect.

In 2015, Nigeria had olefins production capacities of 550,000 tonnes per annum (tpa) ethylene and 125,000tpa propylene with thermoplastic resins capacities of 240,000tpa linear low-density polyethylene (LLDPE) and 95,000tpa polypropylene (PP). Nigeria's petrochemicals sector is characterised by low capacity utilisation, frequently disrupted plant operations and a lack of proper resources to operate and maintain facilities.

## Contents
