Includes 3 FREE quarterly updates

BMI View: Further macroeconomic growth in 2015 is set to provide the Polish commercial real estate sector with the basis for its continuous upward trend. International investors and growing domestic consumer confidence are two main factors in improving demand levels. Poland therefore continues to defend its position as the most stable and commercially attractive market in the region.

Through a focus on the principal cities of Warsaw, Krakow and the Tricity area, the Poland Real Estate report examines the commercial office, retail, industrial and construction segments in the country. With the wider macroeconomic situation in Poland expected to improve further in 2015, investments in the commercial real estate sector are also bound to increase. Transactional activities in 2014 spread through all three sub-sectors we monitor - a trend likely to continue as interest in the market grows, consumer confidence improves and export levels rise.
