Abstracts

Latest Updates & Industry Developments

Qatar ranks third in BMI's latest Risk/Reward Index for the Middle East and North Africa, with a score of 59.1 compared to a regional average of 47.5. The country has a very high mobile penetration rate at 221%, which will be one of the key reasons why we forecast mobile growth to flatten towards the end of the forecast.

Mobile telecoms operator Ooredoo Qatar and Nokia Networks have launched an LTE-advanced (LTEA) network in Qatar. Available in several high-traffic areas of Doha including West Bay, the Corniche and Katara Cultural Village, the network is designed to offer peak download speeds of up to 375Mbps.
