## Abstracts

Includes 3 FREE quarterly updates

BMI View: Speaking at the 14th Defence Services Asia summit held in Kuala Lumpur in April 2014, Singaporean Defence Minister Dr Eng Hen took the opportunity to emphasise the need for a new 'multipurpose' military which can tackle the increasing range of non-traditional security challenges currently facing the international community. Citing the ongoing search mission for the Malaysia Airlines jet believed to have crashed in the South Pacific as an example, Dr Eng sought to demonstrate the extent to which militaries now actively contribute to non-traditional areas. Singapore is leading multilateral efforts to enhance the military response to such non-traditional security threats. Indeed, during an ASEAN-United States Defence Ministers meeting, Singapore offered up the uses of its command and control centre in Changi as a location for a planned ASEAN disaster response hub. Singapore's Ministry of Defence noted that such a centre would allow ASEAN militaries to respond speedily and effectively to any disaster in the region. This proposed centre would see the command and control hub permanently based in Singapore, rather than the disaster-affected country as has traditionally been the case. The centre has infrastructure which would allow an affected country to plug into all the information that various agencies would bring to bear when such a crisis occurs, providing a coherent picture that everyone can see.

## Contents

- BMI Industry View
- Key BMI Forecasts
- Recent Developments
- SWOT
- Singapore Security SWOT
- Singapore Defence & Security SWOT
- Political
- Economic
- Business Environment
- Industry Forecast
