BMI View: Singapore's petrochemicals industry continued to surge in 2014 as aromatics production capacity was boosted by projects on Jurong Island, securing the city state's position as a major supplier to the Chinese market, according to BMI's latest Singapore Petrochemicals report. In 2014, BMI estimates petrochemicals output growth of around 16%, compared to 7% chemicals growth.

The completion of SK Global Chemical (SKGC) subsidiary Jurong Aromatics Corporation (JAC)'s aromatics project in Q314, added condensate splitter and plants with capacity for 800,000 tonnes per annum (tpa) of paraxylene (PX), 200,000tpa of orthoxylene (OX) and 450,000tpa of benzene. This should sustain output growth over 2015.
