Date: March 2016
Pages: 78
Price: US$ 1,295.00 (Single User License)
ID: S391D8A3CACEN

Abstracts

Includes 3 FREE quarterly updates

In 2012, the industrial production index for chemicals declined 0.7% on average, while for rubber and plastic products it plummeted an average of 9.0%, compared with growth of 0.2% and -1.5% respectively in 2011. In the first four months of 2013, the chemicals production index fell by a further 7.3% while the rubber and plastics index fell by 5.0%. This signalled a deterioration of chemical and petrochemicals performance in H113. Although there was an uptick in April, the operating environment has not changed radically to support a sustained recovery.

With the rest of the eurozone caught up in a pronounced slowdown, Spain's capacity to export its way out of recession has disappeared entirely. We estimated that GDP contracted 1.4% in 2012 and the recession should deepen in 2013, when growth should fall to -1.7%. Only a fiscal stimulus is likely to provide a turnaround to escape the debt-deflationary trap Spain is in, but this appears off the cards over the next year.
