Abstracts

Includes 3 FREE quarterly updates

BMI View: Zimbabwe's power crisis will worsen throughout 2016 as prolonged periods of low rainfall decreases the country's hydropower capacity. Struggling to pay for the cost of importing will also add to the country's power shortage woes.

Latest Updates And Structural Trends

Zimbabweans are currently experiencing load shedding of up to 18 hours a day, and the government has even ordered the army and police to cut back on their power usage

The government has banned the usage of electric water geysers, in order to help combat the country's power crisis.

Zimbabwe's power tariffs have been increased to an average of USD0.14 per user, making it the highest tariffs in the Southern African region
