Abstracts

During the 12th Five-Year Plan (2011–2015), supported by the project of R&D and Industrialization of Green Ecological Pesticides (National Key Technology R&D Program of China), the Chinese pesticide industry has made fruitful achievements in technology innovation. During this period, the accumulative area for extension of Chinese independent innovation pesticide reached 100 million ha, with a year-on-year increase of nearly 30% compared with the period of the 11th Five-Year Plan, and the sales value amounted to USD160.59 million (RMB1 billion), up by 200% year on year.

In 1995–Nov. 2016, there were about 86 China-made chemical pesticide ingredients in China?including the ones within the period of validity, or which have been expired, or have not been registered yet.

From this report, you can know the basic information and market dynamics of these 86 ingredients, such as research unit, registrant, time of first registration, time to market, number of production license, industrial development enterprise, etc.
