## Abstracts

Amino acid industry hot topics in 2013:

The EU didn't pass the proposal of providing duty-free and quota-free for lysine imports. This decision played an important part in reducing the market supply pressure.

Thanks to the change in the layout of methionine, Asia will be the next main producing area. Many manufacturers would expand into Asia, and China would be the first choice because of the increasing demand of methionine in Asia.

Fermentation amino acid products' price fell to its historic lows because of the high cost of corn in 2013. But it will not continue to decline.
