Abstracts

Welcome to the June Issue of Amino Acids China E-News.

This newsletter will help you stay ahead of the game in this fast-changing market with real-time reporting on the entire amino acid industry chain, from raw materials to end consumption. It includes breaking news from China and abroad, the latest market data (price, import & export, production, consumption, operating rates, etc.), in-depth analysis of market trends, and expert commentary from industry insiders.

Here is the Editor's Note for you to know about the June issue specifically:

Affected by the downturn in downstream demand, domestic methionine and tryptophan prices continued to decline in June and the prices have been declining for 2 and 3 consecutive months, respectively. The price of tryptophan has been at its lowest level this year.

Company dynamics of amino acid:

Jilin Meihua: 300,000 t/a lysine and its complementary project was publicized for an intended approval. The project has a total investment of USD341.3 million (RMB2.17 billion).

LHG: its first phase construction of the new plant is scheduled to start production once the commissioning is completed by the end of July. However, LHG is facing investors' questions about the delayed progress of its private placement proposal and the mismatch between its low share price and high development expectations.

Huaheng Biotech: to inject up to USD39.3 million (RMB250.0 million) for its 16,000 t/a three branched chain amino acids and their derivatives project.

Kelun Pharmaceutical: its chemical drug, Amino Acids (15) Peritoneal Dialysis Solution was recently approved by the National Medical Products Administration for a drug registration.

Omilai Biotechnology: completed the phased environmental acceptance for its 25,000 t/a food additive and series amino acid production line construction project. At present, the company has a total capacity of 20,760 t/a of amino acids.

Dynamics of downstream breeding industry:

As shown by the China Feed Industry Association, in the first five months of this year, China's total feed output increased significantly year-on-year (up 21.5%, compared with an average annual growth rate of 3.8% in the past 10 years), among which the pig feed increased rapidly (up 75.4%);

According to the Ministry of Agriculture, average price of domestic pork has fallen for 19 weeks in a row as of the first week of June. The price is likely to near the break-even point of pig production. Coupled with price hikes of feed raw materials, profits of pig farmers contracted, leading to their unwillingness to expand production.

CP Group, one of China's largest feed producers and pig breeding enterprises, officially disclosed its prospectus and plans to list on the Main Board of the Shanghai Stock Exchange in order to raise up to USD2,359.5 million (RMB15 billion).

Imports and exports:

In April, the import volume of methionine and the export volume of lysine ester and salt both decreased significantly from the previous month by 27.9% and 32.5%, respectively.

DESCRIPTION

Amino Acids China E-News provides you with real-time intelligence on China's amino acids market.

Contents

Headline

Editor's Note

Market Dynamics

Profits of domestic pig breeding shrank

Feed industry situation during Jan.–May 2021

Company Developments

Jilin Meihua's lysine project published for intended approval

Risks lurk behind LHG's development

Kelun Pharmaceutical's Amino Acids (15) Peritoneal Dialysis Solution approved for registration CP Group to go public

Omilai Biotechnology's amino acid project achieves phased environmental acceptance

Huaheng Biotech to build branched chain amino acids

Price Update

Prices of major amino acids in China, June 2021

Domestic methionine and tryptophan show a momentum of decay

Import and Export Analysis

Imports and exports of selected amino acids in China, April 2021

China's methionine imports and lysine ester and salt exports down in April

News in Brief

Chengyi Pharmaceutical to launch L-aspartic acid new drug

Adisseo (China)'s supply chain completes first bulk export of methionine Yongan

Pharmaceutical's subsidiary launches taurine series products

Adisseo awarded "China's Top 500 Brands in 2021"

Lukang Biological's amino acid construction project (Phase II) publicized

Lifecome's private placement approved

China builds up African swine fever vaccine production line

Star Lake Bioscience's Green Health Industrial Park cancelled

Jinkangfeng to build L-lysine and compound amino acids project

15 Chinese pig enterprises with sow inventory over 100,000 heads

Biok expands amino acid production

Aojie Biotechnology to add amino acid surfactants

Price Update

Prices of major amino acids in China, May 2021

Threonine and lysine prices keep falling in May

Import and Export Analysis

Imports and exports of selected amino acids in China, March 2021

Exports of lysine ester and salt and methionine up in Q1

News in Brief

NHU Amino Acid's methionine project for new EIA publicized

Meihua Group's L-Valine passes EU authorisation

National Food Safety Standard Food nutrition enhancer L-tryptophan to be formulated

Jingjing Pharm's profits tumble in 2020

Yongan Pharmaceutical achieves growth in Q1

Guangrui Biological to add glycine, L-lysine hydrochloride and L-alanine production

CJ Group to produce minor amino acids

Yangcheng County to build a fine chemical park

China's feed output keeps growing in April

Jilin Meihua's lysine project (Phase III) on track
