Abstracts

Atrazine, a triazine herbicide, is widely used worldwide, due to its good herbicidal effect, safety to crops and economical price. China's atrazine is export-oriented, with annual export volume of atrazine technical and formulations accounting for a large share of the domestic annual output every year. In China, atrazine formulations, mainly including 38% SC, 50% SC, 80% WP and 90% WDG, are for domestic application.

In order to help industry players find more opportunities in China's atrazine market, CCM has carried out a comprehensive analysis on atrazine industry, including registration, production, producers, export, consumption, price change, as well as its competing products in China. This report can guide investments and business movements for players who pay close attention to the atrazine industry.

Atrazine Market and Production in China is CCM's tenth edition report on China's atrazine industry, finished in Feb. 2024.
