Abstracts

Description

As an effective additive, BA (benzoic acid) has been being widely applied in lots of fields in China for many years. In current time, most of the BA is consumed in food and beverage industry in the form of NaB (Na Benzoate), while the rest is used to produce other industrial products, such as BA alkyd resins, BA plasticizers, benzoyl chloride, etc. Those products are widely adopted in many industry fields respectively, including coating industry, plastics industry, dyeing industry, agriculture, etc.

In recent years, food-safety problem is becoming more and more apparent in China with increasing attention to be paid to health. NaB which is reckoned to be harmful to health has to face more challenges. Pressure from society and the Chinese government on NaB consumed in food and beverage is higher and higher. Under this circumstance, what's the consumption of NaB in China at present. How about the future?

Currently, influenced by the poor international economy, the development of China's economy has slowed down accordingly. Then, what's the current consumption situation of BA in China? What about the future? How will China's consumption pattern of BA be shaped? And what way will China's BA go?

To figure out these questions, CCM International has carried out a deep investigation into China's BA consumption. In this report, following aspects are highlighted:

Current consumption of BA/NaB in China (2011)

Details for consumption segmentations of BA/NaB in China (2011)

Forecast on BA/NaB demand in China (2012-2016)

Brief comments

It is the first edition report concerning China's BA (benzoic acid) consumption generated by CCM International.

In this report, NaB (Na benzoate) consumption is introduced in detail as NaB is the largest consumption field of BA in China currently. The total consumption volume of BA includes the volume used in NaB production directly by NaB producers. In addition, in NaB consumption, food industry mainly includes condiment, leisure food and pickled food in the report.

The following aspects are included in the report:

Overview of China's BA consumption (2011)

BA consumption situation in alkyd resins in China (2011)

BA consumption situation in benzoyl chloride in China (2011)

BA consumption situation in benzoate plasticizers and esters in China (2011)

BA consumption situation in animal feed in China (2011)

BA consumption situation in other fields in China (2011)

Forecast on BA consumption in China (2012-2016)

Overview of China's NaB consumption (2011)

NaB consumption situation in food industry in China (2011)

NaB consumption situation in beverage industry in China (2011)

NaB consumption situation in other fields in China (2011)

Forecast on NaB consumption in China (2012-2016)

Contents

EXECUTIVE SUMMARY

INTRODUCTION AND METHODOLOGY

1 BA

- 1.1 Overview of BA consumption in China in 2011
- 1.2 End use segmentation of BA in China in 2011
 - 1.2.1 BA alkyd resins
 - 1.2.2 Benzoyl chloride
 - 1.2.3 BA plasticizers
 - 1.2.3.1 Diethylene glycol dibenzoate (DEDB)
 - 1.2.3.2 Dipropylene glycol dibenzoate (DPGDB)
 - 1.2.3.3 Other benzoate esters
 - 1.2.4 Animal feed
 - 1.2.5 Other industrial application
- 1.3 Forecast on demand for BA in China (2012-2016)

2 NAB

- 2.1 Overview of NaB consumption in China in 2011
- 2.2 End use segmentation of NaB in China in 2011
 - 2.2.1 Food
 - 2.2.2 Beverage
 - 2.2.3 Others
- 2.3 Forecast on demand for NaB in China (2012-2016)

List Of Tables

LIST OF TABLES

- Table 1.1-1 BA consumption volume by field in China, 2011
- Table 1.2.1-1 Typical producers of BA alkyd resins in China, 2011
- Table 1.2.2-1 Typical producers of benzoyl chloride in China, 2011
- Table 1.2.3.1-1 Typical DEDB producers in China, 2011
- Table 1.2.3.2-1 Typical DPGDB producers in China, 2011
- Table 1.2.3.3-1 Application of other benzoate esters in China, Aug. 2012
- Table 1.2.4-1 Typical producers of animal feed in China, 2011
- Table 2.1-1 Consumption volume of NaB by field in China, 2011
- Table 2.2.1-1 Typical consumers of NaB, 2011
- Table 2.2.2-1 Typical consumers of NaB, 2011

List Of Figures

LIST OF FIGURES

Figure 1.1-1 Consumption pattern of BA in China, 2011

Figure 1.2.1-1 Coating output in China, 2007-2011

Figure 1.2.3.1-1 Share of phthalate plasticizers and other plasticizers by output in China, 2011

Figure 1.2.3.2-1 Share of BA consumed in BA plasticizers and other benzoate esters in China, 2011

Figure 1.2.4-1 Feed output in China, 2007-2011

Figure 1.3-1 Forecast on BA consumption volume in China, 2012-2016

Figure 2.1-1 Consumption pattern of NaB in China, 2011

Figure 2.2.1-1 Output of soy sauce in China, 2007-2011

Figure 2.2.2-1 Output of carbonated beverage in China, 2007-2011

Figure 2.3-1 Forecast on NaB consumption volume in China, 2012-2016

COMPANIES MENTIONED

Wuhan Youji Industries Co., Ltd. Jiangsu Sanmu Group Co., Ltd. Shanghai Sanwei
Tongli Bio-Technology Co., Ltd. Foshan Haitian Flavoring & Food Co., Ltd. Coca-Cola
China Limited

I would like to order

Product name: Benzoic Acid, Na Benzoate, Benzoate Plasticizers in China

Product link: <https://marketpublishers.com/r/B83088E896BEN.html>

Price: US\$ 13,407.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
