Abstracts

With increasing importance of energy reservation, there has been a rapid development in Chinese biomass energy market in the past few years. And evidence is mounting that biomass energy industry in China will enjoy promising prospect in the long run.

At present, technology bottlenecks and insufficient grain feedstock supply are two major obstacles for development of biomass energy products, including liquid biofuel, biopower generation, solid biofuel and biomass gas.

Rapid economic development of China would drive the demand for energy to rise continuously. However, since fossil fuel has already been in short supply, China would vigorously promote the development of biomass energy industry instead. Besides, China boasts abundant biomass resources such as rice/wheat straw, corn cob, etc., which would further advance China's motivation in this field.

To facilitate the sustainable and sound development of biomass energy industry, Chinese government released a series of policies to set medium and long target for each biomass energy product and provide fiscal subsidy for some important products.

To figure out the current situation and prospect of biomass energy and the limitations for future development in China, the report covers the information on feedstock and their production situation, marketing channels, consumption situation, and future forecast etc. Among them, the feedstock supply and current technology of each biomass energy product are especially given an insightful analysis.

Besides, CCM provides you an insightful analysis on other following questions:

What is the situation of raw material supply and its influence on biomass energy production in China?

Who are key active and potential players in China's biomass energy industry?

What are the key factors affecting each Chinese biomass energy product?

What is the competition situation in Chinese biomass energy industry?

What is the trend of each Chinese biomass energy product in the near future?

How about the policies and incentive for biomass energy industry in China?

Where are the opportunities in the Chinese biomass energy industry?

Contents

Executive summary
Methodology and source

I OVERVIEW OF BIOMASS ENERGY MARKET IN CHINA

I-1 Position of China's biomass energy market in the world
I-2 Classification and characteristics of biomass energy in China
I-3 Development environment of China's biomass market
I-4 Overview of biomass energy development
I-5 Overview of biomass energy utilization

II LIQUID BIOFUEL MARKET

II-1 Summary of China's liquid biofuel market
II-2 Feedstock supply
 II-2.1 For fuel ethanol
 II-2.2 For biodiesel
 II-2.3 For others
 II-2.4 Supply discussion
II-3 Production situation by products
 II-3.1 Fuel ethanol
 II-3.2 Biodiesel
 II-3.3 Others
II-4 Marketing channels of liquid biofuel in China
II-5 Consumption situation
II-6 Forecast on China's liquid biofuel market (2010~2015)

III BIO-POWER GENERATION MARKET

III-1 Summary of China's bio-power market
III-2 Feedstock supply
 III-2.1 Straw-fired power generation
 III-2.2 Bio-gasification power generation
 III-2.3 Biomass co-firing power generation
 III-2.4 Methane power generation
 III-2.5 Refuse incineration power generation
III-3 Technology

- III-3.1 Direct-fired bio-power
- III-3.2 Bio-gasification power generation
- III-3.3 Biomass co-firing power generation
- III-3.4 Refuse incineration power generation
- III-4 Achievements
 - III-4.1 Installed capacity, on-grid generation and distribution
 - III-4.2 Market value for bio-power in China in 2008
- III-5 Limitations for bio-power generation in China
 - III-5.1 Limitation of raw material supply
 - III-5.2 Limitation of technology and equipment
 - III-5.3 Limitation of feed-in tariff policy for biomass
- III-6 Forecast on China's bio-power generation market (2010~2015)

IV SOLID BIOFUEL MARKET

- IV-1 Summary of solid biofuel market in China
- IV-2 Feedstock availability
- IV-3 Achievements
- IV-4 Limitations of solid biofuel utilization in China
 - IV-4.1 Limitations in existing equipments
 - IV-4.2 Limitations in existing bio- briquetting manufacturers
 - IV-4.3 Limitations in investment and financing
- IV-5 Forecast on China's solid biofuel market (2010~2015)

V BIOMASS GAS MARKET

- V-1 Summary of biomass gas market in China
- V-2 Feedstock availability
- V-3 Achievements
- V-4 Limitations of China's biomass gas market
- V-5 Forecast on China's biomass gas market (2010~2015)

VI POLICY AND INCENTIVE FOR BIOMASS INDUSTRY IN CHINA

- VI-1 Main policies and incentives for biomass energy
 - VI-1.1 Laws and plans for bioenergy
 - VI-1.2 Direct bioenergy policies and incentives
- VI-2 Analysis of bioenergy policy and incentive

VII INTRODUCTION TO KEY PLAYERS

VII-1 Company profile

VII-1.1 Fuel ethanol producers

VII-1.1.1 Henan Tianguan Group Co., Ltd.

.....

VII-1.1.6 Sichuan Yangming Energy Technology CO., Ltd.

VII-1.2 Biodiesel producers

VII-1.2.1 Sichuan Gushan Group

.....

VII-1.2.13 China Biofuel International Holding Co., Ltd.

VII-1.3 Biopower generation

VII-1.3.1 National Bio Energy Co., Ltd. (NBE)

VII-1.3.2 China Guodian Group (Guodian)

VII-1.3.3 Wuhan Kaidi Electric Power Co., Ltd. (Kaidi)

VII-2 Competitiveness analysis

VII-3 Potential competitors

VIII CONCLUSION AND OPPORTUNITY

VIII-1 Conclusion

VIII-1.1 Liquid biofuel

VIII-1.2 Biomass power generation

VIII-1.3 Solid biofuel

VIII-1.4 Biogas and biomass hydrogen

VIII-2 Opportunities

VIII-2.1 Liquid biofuel

VIII-2.2 Biomass distributed power generation system

VIII-2.3 Biomass heat supply

VIII-2.4 Circular economy model

LIST OF TABLES

- Table 1 RMB exchange rates against USD, 1994-2009
- Table I-1.1 Top fuel ethanol production countries in the world
- Table I-1.2 Top biodiesel production countries in the world
- Table I-2.1 Characteristics of different biomass energy products in China
- Table I-3.1 Target for each biomass energy product in China
- Table I-5.1 Utilization of different biomass energy products in China
- Table II-1.1 Current situation of liquid biofuel in China
- Table II-2.1.1 Supply & demand situation of corn in China, 2004~2009 (million tonnes)
- Table II-2.1.2 Forecast on situation of corn in China, 2010~2015
- Table II-2.1.3 Supply & demand situation of wheat in China, 2004~2009 (million tonnes)
- Table II-2.1.4 Forecast on wheat situation in China, 2010~2015
- Table II-2.1.5 Economic benefit comparison of alcohols production using different raw materials in China, 2009
- Table II-2.1.6 Output of corn and corn cobs in China, 2004~2009
- Table II-2.1.7 Output of corn and corn stover in China, 2004~2009
- Table II-2.1.8 Output of wheat/rice and wheat/rice straw in China, 2004~2009
- Table II-2.1.9 General information of other potential non-grain feedstock for fuel ethanol production in China
- Table II-2.2.1 Planting area and distribution of *Jatropha curcas* in China, 2009
- Table II-2.2.2 Other potential energy crops for biodiesel in China
- Table II-2.4.1 Relationship between key fuel ethanol producers and COFCO, CNPC
- Table II-3.1.1 Basic information of key fuel ethanol manufacturers in China, 2009
- Table II-3.1.2 Comparison between fermentation enzymatic and hydrolysis technology in China
- Table II-3.1.3 Main manufacturers engaged in second-generation fuel ethanol in China
- Table II-3.2.1 Basic information of key active biodiesel producers in China, March 2010
- Table II-3.2.2 Comparison among three methods in biodiesel production in China
- Table II-3.3.1 Basic information of key biobutanol manufacturers in China, 2009
- Table III-2.1.1 Combustion value and ash content of various kinds of straw
- Table III-2.1.2 Harvest and purchase time of various kinds of straw
- Table III-2.1.3 Price of raw material in March 2009 (USD/t)
- Table III-2.1.4 Economic indicators of two kinds of bio-power generation projects
- Table III-2.1.5 Economic indicators of two kinds of bio-power generation projects
- Table III-2.1.6 Trend comparison of bio-power cost
- Table III-2.2.1 Collection, transport and storage of cotton straw

Table III-2.2.2 Collection, transport and storage of rice straw

Table III-2.3.1 Fuel structure of BXTTP

Table III-2.4.1 Example for biogas power generation

Table III-2.5.1 Main developers of refuse incineration power generation in China, 2008

Table III-3.1.1 Properties of mainstream straw-fired vapor generating set

Table III-3.2.1 Medium-scale biomass gasification power generation technologies in China

Table III-3.2.2 China's self-developed biomass gasifiers

Table III-3.3.1 Main key technologies for biomass-coal co-firing power generation

Table III-3.4.1 Classification of incinerator of refuse power plants in China

Table III-3.4.2 CSCEI's incinerator supply

Table III-4.1.1 Installed capacity and on-grid generation of bio-power in China, 2008

Table III-4.2.1 Benchmark feed-in tariff of biomass power generation

Table III-4.2.2 Market value of bio-power in China in 2008

Table IV-3.1 Main manufacturer and index of roller extruding machine

Table IV-3.2 Main manufacturer and index of piston extruding machine

Table IV-3.3 Main manufacturer and index of screw extrusion machine

Table V-3.1 Adjustment of capital and subsidy standards for rural biogas in 2009

Table V-3.2 Key research institutes in biomass hydrogen in China

Table V-3.3 Comparison of different thermochemical method in producing biomass hydrogen

Table VI-1.1.1 Specific contents of the special fund in China

Table VI-1.1.2 Development plans for biomass energies in China, 2006-2020

Table VI-1.1.3 Major development plans of renewable energy in China by 2010

Table VI-1.1.4 Key bioenergy projects in 11th Five-Year Plan in China

Table VI-1.2.1 Regulations for biofuel industry in China

Table VI-2.1 Support on above aspects of biomass energy

Table VII-2.1 Comparison of the 3 state-owned ethanol producers in China, 2009

Table VII-2.2 Comparison of three leading developers in China, 2009

Table VII-3.1 Potential competitors of fuel ethanol production in the future
