Abstracts

Description:

Bromine is an element widely found in nature, principally in seawater, salt lakes, and underground brines associated with oil. The quantity of bromine sold or used in China in 2008 was 130,000 metric tonnes valued at \$500 million. Bromine compounds are primarily used in flame retardants (49%), organic intermediates (19%), oilfield chemicals (15%), and brominated pesticides (mostly methyl bromide) (3%). Because of depleting reserves, distribution and economics, environmental constraints, the price of bromine rises to a great height.

Bromides intermediates are widely used in dye industry. 2-Bromo-4, 6-dinitroaniline and bromamine acid is the main product. The quality of bromide products is stable, with high content and good solubility, and it is advantageous for the synthesis production of dye product.

This market report comes out in this situation and mainly focuses on the following points:

Elemental bromine supply in China

Price trend of bromine

Main applications in dyestuff industry

Forecast bromide intermediates in dyestuff industry in China

Contents

- 1.1 Development of dyestuff industry
- 1.2 Overview of bromides in dyestuff industry
- 1.3 Main applications in dyestuff industry
 - 1.3.1 2-Bromo-4,6-dinitroaniline
 - 1.3.2 Bromamine acid

COMPANIES MENTIONED

Henan Luoran Co., Ltd., Jiangxi Leping Shunde Chemical Co., Ltd., Jiangsu Yabang Dyestuff Co., Ltd., Jiangsu Taizhou Zhengang Dystuff Chemicals Co., Ltd., Zhejiang Taizhou Dongfeng Chemicals Co., Ltd.

I would like to order

Product name: Bromides Applied in Dyestuff Production in China

Product link: <https://marketpublishers.com/r/B8BD2A938DDEN.html>

Price: US\$ 325.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
