## Abstracts

China Fluoride Materials Monthly Report provides you with real-time intelligence on China's fluorochemicals market.

It is a monthly published newsletter, which can be downloaded in PDF format. The subscription period is yearly, grants the subscriber 12 issues in total.

China is now a leading producer of a whole range of fluorochemicals. However, competition in the industry is shifting as traditional low- to mid-end product sectors such as hydrogen fluoride, aluminum fluoride and cryolite are suffering from severe overcapacity, while other markets such as PTFE, PVDF, LiPF<sub>6</sub> and HFOs are developing rapidly. Meanwhile, the battle is heating up between the HFC and natural refrigerant industries as China transitions away from HCFCs.

China Fluoride Materials Monthly Report will help you stay ahead of the game in this fast-changing market with real-time reporting on the entire fluoride materials industry chain, from raw materials to end consumption. This includes:

Breaking news from China and abroad

The latest market data, including price information for raw materials, intermediates and end products, import/export data, production, consumption, operating rates, etc.

In-depth analysis of market trends, Chinese government policy, the performance of leading Chinese producers, M&A, new technologies, and more

Expert commentary from industry insiders, including regular guest articles and interviews with insiders at leading Chinese manufacturers, associations and government organizations
