Abstracts

This executive summary is extracted from Kcomber's report Chloroform Market in China finished in Aug. 2016.

Chloroform in China is mainly used for producing HCFC-22. However, with the elimination of HCFC-22 used as non-raw material in China, the consumption of chloroform has declined. The apparent consumption volume of chloroform in China was 716,237 tonnes in 2015, with a CAGR of -4.57% from 2013 to 2015.

If there is no breakthrough development of downstream industries of chloroform, the demand for chloroform will face a downtrend.

This executive summary briefs you an overview over chloroform market in China by describing production and consumption of chloroform.
