Abstracts

In recent years, the competition in the CP (Crop Protection) industry has been becoming increasingly intense in China, which is the largest production base and exporter of pesticides in the world at present.

In order to stand out in the intense market, CP producers have developed many types of pesticides to meet their clients' needs. At the same time, they have conducted many commercial activities. They not only develop their sales channel through foreign expansion, exhibition, etc., but also purchase other companies' stock share so as to earn market share in the domestic CP industry as much as possible.

The collaborations and relationships among those CP producers in China are worthy to be noted. In order to find out who are behind those producers, CCM has done a series of deep investigation of 31 CP producers, which are major players in China. Their relationships are clearly shown in a map for readers' convenience.

Furthermore, as these producers have different strategy direction for their own distribution net work, each based on their special product structures, CCM has also selected 10 from the 31 to do further study on their distribution net work as well as application of their products.

In this report, the following aspects will be unfolded to you, presenting the overall CP market in China from those major producers,

Company background (such as employee, contacts and registered capital)

Geographic distribution map for the 31 producers

Relationship and collaboration among the 31 producers

Total assets, revenue, total profit and the share of import & export of the 31 producers
