Abstracts

Description:

CCM has finished a market report named Future of Enzyme in China to 2020 in Feb 2010. In order to meet clients' different demands and provide more low-price products, we separated it into many sub-reports with different specific themes. Competitive Environment and Future Forecast on Enzyme Industry in China is one of the sub-reports.

With intense competition, the enzyme industry in China has undergone great changes in recent years. On one side, China's enzyme industry has been dominated by some large scale producers and many small scale producers have been gradually washed out from the market. On the other side, foreign investors are playing a more and more important role in Chinese enzyme market.

In order to provide comprehensive analysis on China's enzymes industry in recent years and its future prospects, questionnaire survey is conducted in this report, with total 11 respondents including enzyme professors and managers being interviewed on their views of China's enzyme industry.

The survey results unveil the following key issues keenly concerning the future of China's enzyme industry:

- What are the key factors influencing development of China's enzyme industry?
- What are the future opportunities and challenges for China's enzyme industry?
- Which kinds of enzyme are mainly exported and imported?
- What's the future performance for different enzymes in China?
