Abstracts

Description:

In China, ethylenediamines has been widely used in the production of resin, pesticide, pharmaceuticals, etc. At present, China's ethylenediamines products are still in short supply and the demand increases year by year.

Even if it has started production at the end of 1980's, China's ethylenediamines are still in small-scale industrialized production (capacity \geq 10,000t/a) before 2010. However, in November 2010, Jiangxi Hurricane's 10,000 t/a ethylenediamine project is put into commercial production, which will greatly improve the situation that domestic ethylenediamine demand relies on import heavily.

The main consumption fields of ethylenediamines in China concentrate in resin, pesticide, pharmaceutical, complexant, polyurethane foam, spandex, plastic, bleach and paint, etc, and the total consumption volume of ethylenediamines has reached about 42,600 tonnes in 2010. What kinds of ethylenediamines are consumed in these main consumption fields; what's the consumption volume and who are the main end users? This report will tell you the volume and the main end users.

Contents

1 CONSUMPTION SITUATION

- 1.1 Resin
- 1.2 Pesticide
- 1.3 Pharmaceutical
- 1.4 Complexant
- 1.5 Polyurethane catalyst
- 1.6 Spandex chain extender
- 1.7 Plastic lubricant
- 1.8 Bleach activator
- 1.9 Paint additives
- 1.10 Others

COMPANIES MENTIONED

BASF (China) Company Limited, Cardolite Chemical Zhuhai Co., Ltd., Guodu Chemical (Kunshan) Co., Ltd., Limin Chemical Co., Ltd., Jiangsu Kwin Group (Holding) Co., Ltd.
