## Abstracts

### Description

Lambda-cyhalothrin is one major kind of pyrethroid insecticides in China. It is a kind of broad-spectrum, high-efficiency and low-toxicity insecticide, thus it is widely used in agriculture and public health and act an important role in pesticide industry in China. Due to the lower entrance threshold of lambda-cyhalothrin industry and the blind capacity expansion of producers in the past few years, the capacity of domestic lambda-cyhalothrin is in serious surplus now.

Production Situation of lambda-cyhalothrin in China is CCM International's first edition report on Chinese lambda-cyhalothrin industry, finished in July 2012. This intelligence report attaches importance to the following parts:

Update all the data related to lambda-cyhalothrin industry from technical and formulations in China in the past few years, including supply, registration, export, price, etc.

Identify the key producers and active producers of lambda-cyhalothrin industry in China.

### Brief comments

The Production Situation of Lambda-cyhalothrin in China is an intelligence report on lambda-cyhalothrin industry in China. This study reveals the historical development of Chinese lambda-cyhalothrin industry, which is comprised of two major sections: A full

market study provides comprehensive understanding to China's lambda-cyhalothrin situation in the past two years. The intelligence data is presented by various indexes, such as supply (capacity, output, producers, etc), export (export volume, export destination, export price, etc), price (ex-work price), etc.

This report attaches importance to the following aspects:
