Abstracts

Description:

CCM has finished a market report named Future of Enzyme in China to 2020 in Feb 2010. In order to meet clients' different demands and provide more low-price products, we separated it into many sub-reports with different specific themes. Demand and Competitive Environment of Enzyme in China is one of the sub-reports.

China is the second largest native starch consumption country in the world, with total consumption value of USD6.10 billion in 2008, of which USD700.00 Driven by strong growth momentum of Chinese economy in past few years, China's enzyme industry has witnessed great development. Currently China is one of the most important enzyme suppliers and consumers around the world, with total sales value in China up to USD0.15 billion in 2009.

With intense competition, the enzyme industry in China has undergone great changes in recent years. On one side, China's enzyme industry has been dominated by some large scale producers and many small scale producers have been gradually washed out from the market. On the other side, foreign investors are playing a more and more important role in Chinese enzyme market.
