## Abstracts

Emamectin benzoate is a new product in China, and many Chinese companies started commercial production after 2002. The production technology to make the 80% material is not mature in China, and it is hard for some domestic producers to guarantee that the content of final product will reach 90%.

There are 11 active producers of emamectin benzoate in China as of January 2005.

There is no GB standard for emamectin benzoate in China, and three grades of emamectin benzoate are produced including technical grade powder, technical grade powder and EC grade.

The price of emamectin benzoate is mainly influenced by the production technology of catalyst and reagents.
