With rapid demand increase of agricultural products and more importance attached by Chinese government to agriculture industry, China's fertilizer industry will usher many new development opportunities, especially for high-end compound fertilizers and new-type fertilizers. To figure out the current situation and prospect of fertilizer industry in China, this report widely covers information about raw materials, production and consumption situation, competitive analysis, future forecast, governmental policies and main producers, etc.

At present, overcapacity of China's nitrogenous, phosphate and compound fertilizer industries has led to serious imbalance between supply and demand, thus integration stage of these industries is coming. Besides, the high energy consumption in the production process and low usage rate of fertilizer need to be improved urgently. In China, almost all fertilizer manufacturers are domestic enterprises with most of them being state-owned enterprises who have received great support from government.

Fertilizer market in China is enjoying promising prospect and CCM provides you an insight analysis on the following aspects:

- To provide an overview of fertilizer industry in China;
- To understand the position of fertilizer sector in China's agriculture industry;
- To know the raw materials of fertilizer production;
- To survey current production situation of fertilizer;
- To assess China's technology level of fertilizer production;
- To assess the key players of fertilizer in China, including producers and end users
- To discuss the influence of governmental regulation on fertilizer industry;
- To find out drivers behind the development of fertilizer;
- To forecast the future of China's fertilizer industry;
- To identify commercial opportunities in China's fertilizer market.

Executive Summary
Introduction and methodology

I OVERVIEW OF CHINESE FERTILIZER INDUSTRY

- I-1 Position of Chinese fertilizer industry in the world
- I-2 Industrial cycle of fertilizer in China
- I-3 Overview of fertilizer production
- I-4 Overview of fertilizer market
- I-5 Policy on Chinese fertilizer industry

II NITROGENOUS FERTILIZER

- II-1 Upstream industry of nitrogenous fertilizer

- II-1.1 Coal
- II-1.2 Natural gas
- II-2 Overview of production
- II-3 Analysis of market
 - II-3.1 Market by crop
 - II-3.2 Market by product
 - II-3.3 Market distribution
 - II-3.4 Consumption habit
 - II-3.5 Trade analysis
- II-4 Forecast on nitrogenous fertilizer in China (2010~2015)

III PHOSPHATE FERTILIZER

- III-1 Upstream industry of phosphate fertilizer
- III-2 Overview of production
- III-3 Analysis of market
 - III-3.1 Market by crop
 - III-3.2 Market by product
 - III-3.3 Market distribution
 - III-3.4 Consumption habit
 - III-3.5 Trade analysis
- III-4 Forecast on phosphate fertilizer in China (2010~2015)

IV POTASH FERTILIZER

- IV-1 Upstream industry of potash fertilizer
- IV-2 Overview of production
- IV-3 Analysis of market
 - IV-3.1 Market by crop
 - IV-3.2 Market by products
 - IV-3.3 Market distribution
 - IV-3.4 Consumption habit
 - IV-3.5 Trade analysis
- IV-4 Forecast on potash fertilizer in China (2010~2015)

V OTHER FERTILIZER

- V-1 Production situation
- V-2 Consumption situation
- V-3 Market feature and trend

VI FUTURE PROSPECT ON CHINESE FERTILIZER INDUSTRY

VII CONCLUSION
