## Abstracts

Against the backdrop of global warming, major pests and disease on food crops are expected to occur heavily in 2024, posting greater threats to food crop yields and challenging global agricultural production in a critical way. On one hand, with temperature on the rise, the reproduction cycle of pests, diseases, weeds and rodents is shortened, leading to rapid growth of population size. On the other hand, the continuous development of global trade and tourism has facilitated pest and disease spreading.

The rapid spread of pests and diseases between nations and regions has complicated efforts to prevention and control. Meanwhile, heavy occurrence of pests and diseases also spikes demand on pesticide market. Farmers have to use more pesticides to control pests and diseases for the sake of crop yield and quality, which provides pesticide producers with broad market space and business opportunities. With the development of technology, novel pesticides with greater controlling effect and less residue are in demand to better serve consumers' needs for food safety, which is expected to bring the research and development of relevant products under spotlight.

In this report, CCM will provide the occurrence of pests and diseases on wheat, rice, corn and other crops in 2023, as well as forecasts on the occurrence of pests and diseases in China in 2024 from the following aspects:

Wheat

Rice

Corn

Rape

Soybean

## Contents

Executive summary

Methodology

### **1 PREDICTION FOR OVERALL OCCURRENCE OF MAJOR CROP PESTS AND DISEASES**

### **2 REVIEW ON CONTROL OF PESTS AND DISEASES ON MAJOR CROPS IN CHINA, 2023**

2.1 Occurrence of major pests and diseases on wheat in China

2.2 Occurrence of major pests and diseases on rice in China

2.3 Occurrence of major pests and diseases on corn in China

2.4 Occurrence of major pests and diseases on rape in China

2.5 Occurrence of major pests and diseases on soybean in China

### **3 FORECASTS OF MAJOR PESTS AND DISEASES IN CHINA FOR 2024**

3.1 Forecasts of major pests and diseases on wheat

3.2 Forecasts of major pests and diseases on rice

3.3 Forecasts of major pests and diseases on corn

3.4 Forecasts of major pests and diseases on rape

3.5 Forecasts of major pests and diseases on soybean

3.6 Forecasts of major pests and diseases on other crops

## List Of Tables

### LIST OF TABLES

Table 3.1-1 Forecasts on occurrence area of wheat pests and diseases in China in 2020–2024, million ha

Table 3.2-1 Forecasts on occurrence area of rice pests and diseases in China in 2020–2024, million ha

Table 3.3-1 Forecasts on occurrence area of corn pests and diseases in China in 2020–2024, million ha
