This is the third edition report, which is updated on the basis of second edition. The first edition and the second edition were finished in 2006 and 2007, respectively.

The report provides readers with a comprehensive overview about China's fumaric acid industry. In this report, production, export & import and consumption are the emphases, which will offer readers good understanding about the capacity, output, manufacturers, trade as well as the application situation in 2007. Apart from that, the report also introduces briefly the technology, raw materials, price, etc. In the technology section, the most popular method is described. In the price section, the quoted price from producers has been reviewed, and the current is summarised. Moreover, the factors leading to price changes are discussed, from the aspects of demand & supply, raw material and product quality. Future forecast and conclusion is the soul of this report.

All the active producers of fumaric acid are introduced in detail.
