Abstracts

Fungicides China News provides you with real-time intelligence on China's fungicides market.

It is a monthly published newsletter, which can be downloaded in PDF format. The subscription period is yearly, grants the subscriber 15 issues in total.

The development of Chinese agriculture has increased demand for fungicides significantly in recent years, but the industry is now crying out for capital, more advanced technology and higher quality products. China's tightening environmental regulations are also having a great effect on producers.

Fungicides China News will help you stay ahead of the game in this fast-changing market with real-time reporting on the entire fungicides industry chain, from raw materials to end consumption. This includes:

Breaking news from China and abroad

The latest market data, including price information for raw materials, intermediates and end products, import/export data, production, consumption, operating rates, etc.

In-depth analysis of market trends, Chinese government policy, the performance of leading Chinese producers, M&A, new technologies, and more

Expert commentary from industry insiders, including regular guest articles and interviews with insiders at leading Chinese manufacturers, associations and government organizations

HEADLINE

India is a large exporter of pesticide, dye and pigment in the world. However, its production is now constrained due to the steadily worsening epidemic. Therefore, a number of export orders of the countries are expected to shift to China.

According to CCM's price monitoring, the average ex-works price of prothioconazole TC in May was USD83,211/t (RMB540,000/t), down 0.92% MoM and 6.90% YoY (when measured in RMB). It is worth noting that the ex-works prices of prothioconazole TC has kept decreased since Oct. 2020.

At the end of May, the price of most fungicides in China showed a downward trend compared with that of the previous month, mainly due to weak downstream demand.

At the end of April, CCM learned from Qingdao Hailir that the company's 2,000 t/a prothioconazole TC production facilities have realized stable output since the production line was put into trial production in Sept., 2020. By the end of 2020, altogether 200.45 tonnes of prothioconazole TC have rolled off the production line. The production processes of the line are still being tested, optimised, and upgraded so as to avoid safety hazards and increase productivity.

Hubei Wojia plans to carry out a 300 t/a high-efficiency green agrochemical TC capacity building and 4,500 t/a agrochemical TC technology upgrading project. To be more specific, the project will add 4 new products to the company's agrochemical portfolio, namely, chlorantraniliprole, carfentrazone-ethyl, flutriafol and hexaconazole, and will upgrade the manufacturing technologies of 7 existing products, namely, tebuconazole, propiconazol, azoxystrobin, bentazone, sulfentrazone, metamitron and imazamox.

On May 19, 2021, Jiangsu Lanfeng announced the production suspension of its phosgene synthesis device. Phosgene is the upstream raw materials for the productions of some major products such as pesticides and intermediates of fine chemicals. Therefore, the production suspension will have a certain impact on Jiangsu Lanfeng. According to the import and export data sourced from Tranalysis, in Jan., 2021, China exported 282.76 tonnes (actual volume) or 245.28 tonnes (100% AI volume) of azoxystrobin to 9 main destinations including the US, Uganda and Vietnam.

The fourth list of pesticide products to be approved for registration in 2021 published by ICAMA contains a fungicide for the control of diseases on pseudo-ginseng, which is picoxystrobin 10% CS from Shandong Zhongxin. The product is registered for the

control of pseudo-ginseng root rot as well as pseudo-ginseng black spot.

MOA released a notice requiring effort in field management of summer grain in late growing period to resist disasters and ensure a good harvest. Prevention of heavy precipitation, strong wind, hail, dry, hot wind, bad weather and rain should be done to ensure the safety, maturity and harvest of summer grain.

Wheat crops in Hebei Province have started heading, a critical period for wheat production. However, wheat stripe rust is spreading at a faster pace in wheat planting areas in the central part of the province. It's necessary to take prevention and control measures against the disease.

Contents

Headline

Editor's Note

Column 1 Market Dynamics

Global demand for China's pesticide may increase amid epidemic in India

Domestic prices of Chinese prothioconazole may face further decline

Decrease in price of fungicides in China in end-May

Column 2 Company Dynamics

Qingdao Hailir's prothioconazole TC producing facilities gradually realize stable output

Hubei Wojia to build production capacity of flutriafol and hexaconazole

Suspended phosgene device to impact Jiangsu Lanfeng's thiophanate-methyl TC production

Column 3 Import and Export

China's export of azoxystrobin to main destinations in Jan., 2021

Column 4 Registration

Product for controlling diseases on pseudo-ginseng to be approved for registration

Column 5 Policy

MOA: to pay effort in field management of summer grain in late growing period

Column 6 Diseases

Wheat stripe rust spreads faster in central part of Hubei Province

MOA urgently deploys work for prevention and control of wheat head blight during harvest

Column 7 Brief News

Wheat head blight control in Anhui Province completed

First zhongshengmycin product for seed treatment in China approved for registration

Prothioconazole TC and formulations highly promote profit growth of Anhui Jiuyi

Large room for development of fluopyram in China

China approves folpet to be used on crop fields for first time

20 pesticides to be banned in EU, with triazole fungicides most affected

Limin Group being always promoting plant protection science and technology

China approves azoxystrobin to be used on garlic for first time

Gansu Langmaqiyn's tebuconazole production line to go into operation by end of 2021

Column 8 Price Update

Ex-works prices of main fungicides in China, 8 May, 2021

Shanghai Port prices of main fungicides in China, 8 May, 2021

FOB Shanghai prices of main fungicides in China, May, 2021
