Abstracts

China's inulin industry has seen a fast growth after it achieved commercialization in large-scale in 2001. However, during 2008 to 2010, Chinese inulin industry has witnessed a slightly decrease due to the impact of 2008 global financial crisis and the decreased output of inulin. Some producers have been washed out due to profit deficit, blaming the rise in the price of raw material. While some have expanded production capacity of inulin. In this report, you can find out the latest production situation in China.

With 13 active producers nationwide, China's total output of inulin reaches 2,997 tonnes in 2010. Among them, Qinghai Weda Biotechnology Co., Ltd., Shanxi Probiotics Yuan Biological Technology Co., Ltd., Zhangye Yunpeng Biotechnology Co., Ltd. are big producers. Meanwhile, dairy products, health products and pharmaceuticals are the top three consumption fields in China.

Additionally, another focus in this report is the latest trade situation, raw material supply, key influencing factors and future forecast of inulin industry in China. The report combines with CCM's expertise on market research to illustrate the latest situation of inulin industry.

Key sections of this report:
