Abstracts

Description:

In China, ethylenediamines has been widely used in the production of resin, pesticide, pharmaceuticals, etc. At present, China's ethylenediamines products are still in short supply and the demand increases year by year.

Even if it has started production at the end of 1980's, China's ethylenediamines are still in small-scale industrialized production (capacity \geq 10,000t/a) before 2010. However, in November 2010, Jiangxi Hurricane's 10,000 t/a ethylenediamine project is put into commercial production, which will greatly improve the situation that domestic ethylenediamine demand relies on import heavily.

China's ethylenediamines supply mainly relies on import, and the import volume has been increasing with the growth rate of 13% in recent 10 years. What's the import situation of ethylenediamines in these two years(from 2009 to 2010) and who are the main importers?

Contents

1 MPORT ANALYSIS IN 2009 AND JAN.~OCT. 2010

- 1.1 Ethylenediamine
- 1.2 Piperazine
- 1.3 Triethylene diamine
- 1.4 Triethylene tetramine
- 1.5 Polyethyleneimine

COMPANIES MENTIONED

Ningbo Fobao Logistics Co., Ltd., BASF (China) Company Limited, Zhejiang Guobang Chemicals Co.,Ltd., Zibo Fulu International Trading Co., Ltd., BASF (China) Company Limited
