## Abstracts

### Description:

By the increasing plastic product consumption, the demand for bromine and bromides has developed rapidly. Since 2008, China's bromine output has decreased year by year, which makes domestic supply of bromine can not meet the demand from the downstream industries, especially from inorganic bromides industry. Recently, China has the trend of buying bromine and bromides from oversea.

Driven by the strong demand, China's bromine and bromides industry has a bright future and many excellent investment opportunities.

In this report, the following hot points will be covered:

Status of bromine element supplier in China

Price trend of bromine

Analysis on key foreign-owned enterprises and joint venture enterprises in China

Forecast on bromine supply and price trend in China
