Abstracts

Methylal, an environment-friendly dissolvent, is mainly applied to insecticides, water based coating and cleaning agent. With its good dissolubility and environmental performance, it becomes a great substitute to toxic dissolvent.

The methylal industry is facing overcapacity in China at present. The total capacity of methylal was about 1,600,000 t/a in 2015 while the average utilization of capacity was just about 37%.

Most of the methylal producers in China adopt the synthesis method rather than the recovery method by which methylal is produced with a lower purity.

Because most producers are only able to produce methylal with the purity from 85% to 90% by the synthesis method, the methylal with the purity of over 90% is few in the Chinese market. Higher-purity methylal products can be sold at a better price with greater profits; thus, it makes a good investment opportunity.

For your better understanding and decision-making about the methylal market in China, CCM's report Market Overview of Methylal Utilized as Dissolvent in China provides you the latest and key information of methylal market in China.

In this report, you will be able to find your answers as we will show you:

Production and consumption of methylal utilized as dissolvent in China

Technology of methylal utilized as dissolvent in China

Evaluation of production cost of methylal utilized as dissolvent in China

Contents

EXECUTIVE SUMMARY

METHODOLOGY

1 PRODUCTION AND CONSUMPTION OF METHYLAL UTILIZED AS DISSOLVENT IN CHINA, 2015

2 TECHNOLOGY OF METHYLAL UTILIZED AS DISSOLVENT IN CHINA

3 EVALUATION OF PRODUCTION COST OF METHYLAL UTILIZED AS DISSOLVENT IN CHINA, MAY 2016

List Of Tables

LIST OF TABLES

Table 1-1 Capacity and output of major producers of methylal using synthesis method in China, 2015

Table 1-2 Capacity and output of major producers of methylal using recovery method in China, 2015

Table 2-1 Technology of major producers of methylal in China

Table 2-2 Production processes of synthesis method of methylal by production pattern in China

Table 2-3 Production processes of synthesis method of methylal by catalyst in China

Table 3-1 Evaluation of industrial average production cost of methylal by synthesis method in China, May 2016

COMPANIES MENTIONED

Zhenjiang Lee Chang Yung General Chemical Co., Ltd.

Puyang Cabot Chemical Co., Ltd., Yulin Yushen Clean Energy Co., Ltd.

Hubei Trisun Chemical Co., Ltd.

Fuhua Tongda Agro-chemical Technology Co., Ltd.

Zhejiang Wynca Chemical Group Co., Ltd.

I would like to order

Product name: Market Overview of Methylal Utilized as Dissolvent in China

Product link: <https://marketpublishers.com/r/MDCC2BFE51DEN.html>

Price: US\$ 972.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
