Abstracts

China officially approved the application of aspartame in foods and beverages in 1986. After years of development, China has become the world's largest producer of aspartame.

The production of aspartame in China is concentrated in a few producers. The number of aspartame producers in China decreased from seven in 2016 to five in 2020. From 2017 to 2020, the production capacity of aspartame remained stable, and the supply-demand relationship was mainly affected by foreign markets. In 2019-2020, about 90% of China's aspartame output was exported.

In China, aspartame is mainly consumed in beverages, food and other industries, among which beverages are the largest consumption field, accounting for over 50% of domestic aspartame consumption in 2020. Carbonated beverages is the largest end use segment, and the consumption of aspartame accounted for 26.9% of the national total in 2020.

This first edition report on China's aspartame industry, formulated in May 2021, focuses on the situation of China's aspartame industry in 2019 and 2020, as well as forecasting its future development trend. The report aims to disclose the latest production and market information of China's aspartame industry. The data for 2020 and before are based on CCM's database and other various sources as mentioned in the section of methodology.

This market research provides detailed analysis on the elements affecting the development of aspartame industry in China, as well as current and historic development of the industry. Market drivers, restraints, opportunities and relative policies can be found in this report.
