Abstracts

This report focuses on the market research of distillers dried grains with solubles (DDGS) in China. DDGS is the by-product of corn alcohol. Because of its rich nutrition, DDGS has been widely used as a new type of protein feed at home and abroad. In China, DDGS is almost consumed in feed industry, mainly applied in feed of pigs, poultry and aquatic animals.

In recent years, China's corn alcohol industry has been plagued by many problems, such as overcapacity, governmental interference and the impact from non-grain ethanol. In addition, DDGS also faces the challenges of imported DDGS and the downturn of downstream industry.

Detailed information of domestic DDGS market situation given by this report is as below:

Supply situation of DDGS in China, including output, major manufacturers, import, comparison with other major competitive products, supply forecast, etc.;

Demand situation of DDGS in China, including consumption, major downstream application pattern, demand forecast, etc.;

Influences of Chinese policies on DDGS;

Price analysis of DDGS in China, including historical price and current price trend, influencing factors, price forecast, etc.;

Suggestions and opportunities.
