Abstracts

The Executive Summary of Market Research of Insect Protein in China is from CCM's report Market Research of Insect Protein in China, which is finished on 17 Feb., 2015.

China has a long history in raising insects for feed. Mealworm, maggot and earthworm are three traditional feeds in the animal raising industry. In the last decade, with the increasing demand for mealworm from the oversea market, more and more insect farms were established for the export business and a commercial business chain of insect protein has been built up.

This Executive Summary mainly states the supply situation of mealworm, manufacturers of mealworm in China and the export of mealworm products in the domestic market and oversea market.

The Executive Summary of Market Research of Insect Protein in China briefs you the general market situation of mealworm products and know about the future trend of insect protein industry in China.
